# Educational material

Our speciality is educational materials, for which we are globally known. However, we are not satisfied for them simply to fulfill the function allocated to them, they also need to be made of superior quality and have a suitable teaching guide and strong presentation.

We have divided these products into subject areas to make selection easier.

- Discovering oneself
- Intercommunication and expressive language
- Discovering of natural, social and cultural environment
- Intercommunication and mathematic language:  
numbers, mathematical operations, shapes and combination and distinction.
